

ENVIRONMENTAL POLICY

The Environmental Policy of Green Piling Limited

This policy statement sets out the environmental commitments for Green Piling Limited ('the Company'). It has been confirmed by the Managing Director and is consistent with our policy.

Our activities are designed to reduce our harmful impact on the environment and everyone working for the Company or on its behalf is asked to support this statement.

This policy statement updates and replaces all previous statements. It will be reviewed regularly by the Managing Director who will take advice from suitably qualified persons and from those whom this policy may affect. If necessary, a revised version of the policy will be issued to reflect the latest developments. He will communicate this policy and any development in an appropriate and effective way.

1. Introduction

We recognise that organisations of all kinds are, increasingly, determined to achieve and demonstrate sound environmental performance by controlling the impact on the environment by their activities, products and services. This is in the context of growing environmental awareness, increasingly stringent legislation and other factors promoting environmental protection and best practice.

We are concerned about the environment and recognise that good environmental management must be an integral and fundamental part of our business strategy.

2. Scope of Policy Statement

This statement covers our premises at Suite 1 Frost House Woodhouse Green Thurcroft Rotherham S66 9AN. It covers all buildings, goods and services used and provided by us and everyone working for us. It concerns the immediate impacts of our activities and policies.

The policy excludes the indirect impacts of our goods and services that we cannot control or influence and also our suppliers' impacts that we are unable to influence.

3. Environmental Commitments

In the course of our operations, and within resource constraints, we will improve our environmental performance by:

3.1 Resources

- a. conserving energy, water, wood, paper and other resources, particularly those which are scarce or non renewable, while still providing a safe and comfortable working environment;
- b. reducing waste through re-use and recycling and by using refurbished and recycled products and materials where such alternatives are economical and suitable;
- c. ensuring that any products used or derived from wildlife, such as timber and plants, are from sustainable sources and comply with European Union and international trade rules such as CITES (the Convention on International Trade in Endangered Species).

3.2 Pollution

- a. monitoring relevant discharges and emissions to air, land and water to ascertain what action is necessary to reduce pollution or the risk of pollution;
- b. phasing out, where practical, ozone depleting substances and minimising the release of greenhouse gases, volatile organic compounds, vehicle emissions and other substances damaging to health and the environment.

3.3 Management – Regulations

- a. aiming to meet, and in some cases exceeding, all relevant, current and foreseen statutory regulations (including the Environmental Information Regulations), codes of practice and other requirements that we adopt;
- b. specifying that contractors comply with the same when working on our premises;
- c. developing and maintaining emergency procedures for effectively dealing with significant hazards where they exist and limiting the risk to health and the environment.

3.4 Management – Communication

- a. communicating openly with staff and others, educating, training and motivating our colleagues and other relevant persons and organisations to encourage them to support our environmental objectives;

- b. responding appropriately to reasonable external requests for environment information.

3.5 Management – Purchasing

Whether any goods or services are environmentally preferable will be an important factor when any purchasing decision is made.

3.6 Management – Estates

Ensuring, wherever practicable, either through our own actions or by negotiation with any landlord, that buildings occupied by us are designed, constructed and operated to optimise their environmental performance.

3.7 Management – Environment

- a. demonstrating that, where relevant, environmental issues are considered when making decisions, planning and developing policy, programmes and projects;
- b. monitoring progress against the environmental aim and other indicators.

4. Objectives and Targets

- 4.1 We shall set annual environment improvement objectives and targets which are regularly monitored and reviewed;
- 4.2 The objectives and targets shall be publicised throughout our organisation and all staff committed to their achievement;

5. Publication

- 5.1 This policy and the obligations and responsibilities required by any environmental management system implemented by us has been or will be communicated to all employees;
- 5.2 The policy is available to the public on request.
