

Greenpiling

## Residential Development – Whitby

### Details

Green Piling undertook the construction of a contiguous piled retaining wall on a new residential development. This was constructed to provide support to the existing carriageway. Prior to commencing works on site, consultation with our client was undertaken to agree the sequence of works as the site was available in two areas (split level). This was a complex design, but the works were completed to the satisfaction of our client with positive feedback received.
