

Greenpiling

The Range – Various Locations

Details

Green Piling carried out the installation of several mezzanines for the Range over varying locations using a mix of mini piles and precast concrete piles. Due to time constraints multiple rigs were used in some sites so the project could be completed before the Christmas period. If required sites also had pre-boring to ensure obstructions were removed to enable the project to be completed on time.

Key Information

Duration	Sept-Nov 2010	Number of piles	86 Piles total
Rig	D1000	Pile Loads	Up to 220kN
Piling System	Steel Tube & precast Concrete	Pile Lengths	from 5m -20m
Ground conditions	Mixture	Testing Regime	Dynamic
